protezione  
ambiente energia  
emilia-romagna

**Periodo di riferimento:**  
1961-1990

**Periodo di proiezione:**  
2021-2050

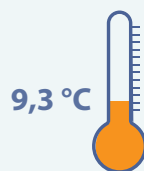

**Scenario** emissivo:  
RCP 4.5

**Fonte dati:**

Dataset Eraclito v. 4.2

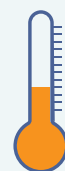

**Metodo di elaborazione:**

Regionalizzazione  
statistica applicata a  
modelli climatici globali

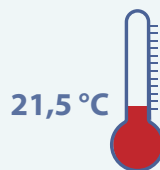

9,3 °C

**Temperatura  
media  
annua**

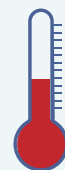

11,0 °C

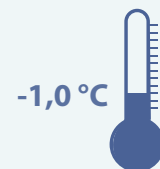

21,5 °C

**Temperatura  
massima  
estiva**

24,8 °C

-1,0 °C

**Temperatura  
minima  
invernale**

0,2 °C

1961-1990

2021-2050

### Precipitazione annua

1450 mm

1340 mm

1961-1990

2021-2050

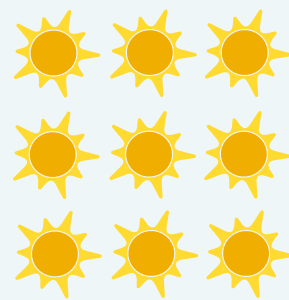

### Durata massima delle onde di calore estive

3

giorni consecutivi

1961-1990

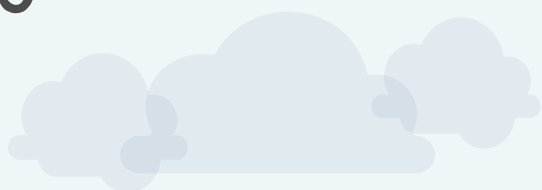

9

giorni consecutivi

2021-2050

### Periodo massimo senza precipitazioni in estate

18

giorni consecutivi

1961-1990

23

giorni consecutivi

2021-2050

### Notti tropicali estive

1

notte estiva

1961-1990

3

notti estive
