# INDICE

## SEZIONE A — TERMOMETRIA

Abbreviazioni e segni convenzionali . . . . . Pag. 5
Contenuto delle tabelle — Consistenza della rete termometrica . . . . . „ 5
Elenco e caratteristiche delle stazioni termometriche . . . . . „ 6
Tabella I — Osservazioni termometriche giornaliere . . . . . „ 8
„ II — Valori medi ed estremi della temperatura . . . . . „ 35

## SEZIONE B — PLUVIOMETRIA

Abbreviazioni e segni convenzionali — Terminologia . . . . . „ 41
Contenuto delle tabelle — Consistenza della rete pluviometrica . . . . . „ 42
Elenco e caratteristiche delle stazioni pluviometriche . . . . . „ 43
Tabella I — Osservazioni pluviometriche giornaliere . . . . . „ 48
„ II — Totali annui e riassunti dei totali mensili delle quantità di precipitazione . . . . . „ 111
„ III — Precipitazioni di massima intensità registrate ai pluviografi . . . . . „ 119
„ IV — Massime precipitazioni dell'anno per periodi di più giorni consecutivi . . . . . „ 124
„ V — Precipitazioni di notevole intensità e breve durata registrate ai pluviografi . . . . „ 127
„ VI — Manto nevoso . . . . . „ 133

Elenco alfabetico delle stazioni termo-pluviometriche . . . . . „ 139

*Tabella I.* — Osservazioni termometriche giornaliere. *Anno 1963*

| Precipitazione nulla | — |
| Dato incerto | ? |
| Dato mancante | » |
| Dato interpolato | [ ] |
| Gocce | goc |
| Fiocchi (precipitazione nevosa non misurabile) | fioc |

## TERMINOLOGIA

1. — Altezza di precipitazione (mm): quoziente del volume di acqua raccolta nel pluviometro (compresa eventualmente la neve fusa) per l'area della superficie orizzontale dell'imbuto raccoglitore.

2. — Giorno piovoso: giorno in cui è stata misurata un'altezza di precipitazione uguale o superiore ad un millimetro.

3. — Intensità media di precipitazione, in un dato intervallo di tempo: quoziente dell'altezza di precipitazione nell'intervallo per la durata di questo.

# CONTENUTO DELLE TABELLE

Le tabelle sono precedute dall'elenco e caratteristiche delle stazioni di osservazione che hanno funzionato nell'anno.

I valori delle precipitazioni riportati sono espressi in millimetri di acqua e comprendono pioggia e neve fusa.

TABELLA I. — Per ogni stazione riporta la quantità di pioggia caduta giornalmente ed i totali mensili ed annuo della precipitazione e del numero dei giorni piovosi.

Per le stazioni dotate di apparecchiatura a lettura diretta (pluviometri comuni e pluvionivometri) le osservazioni vengono eseguite ogni giorno, generalmente alle ore 9 ed il risultato viene attribuito al giorno stesso della misura: il valore segnato rappresenta quindi la quantità di precipitazione caduta nelle 24 ore che hanno preceduto la misura.

Per le stazioni dotate di pluviografo, si riporta, per ogni giorno, la quantità di pioggia che dal diagramma risulta caduta nelle 24 ore comprese fra le ore 9 del giorno precedente e le ore 9 del giorno di cui si tratta.

Con carattere **grassetto** è stampato il massimo quantitativo giornaliero misurato per ogni mese.

TABELLA II. — Per le stesse stazioni di cui alla tabella I, riporta i totali mensili ed annui delle quantità di precipitazione.

Per ciascuna stazione è riportato in **grassetto** il più elevato dei valori mensili ed in *corsivo* il più basso.

TABELLA III. — Per le stazioni dotate di pluviografo, riporta i dati relativi ai valori più elevati delle precipitazioni registrati, nell'anno, per 1, 3, 6, 12, e 24 ore consecutive appartenenti o no allo stesso giorno.

Sono considerate le precipitazioni iniziate dopo le ore 0 del primo gennaio e quelle, eventualmente terminate dopo le ore 24 del 31 dicembre.

TABELLA IV. — Per alcune stazioni, opportunamente scelte, riporta i massimi valori delle precipitazioni verificatesi per 1, 2, 3, 4, e 5 giorni consecutivi, appartenenti o no allo stesso mese. Sono considerati solamente i periodi il cui inizio cade entro l'anno anche se eventualmente sono terminati nell'anno successivo.

Per le durate da 2 a 5 giorni le altezze possono essere talvolta uguali a quelle di durata inferiore; il periodo indicato è sempre quello nel quale si è verificata l'altezza considerata. E ciò per evitare che il massimo di 2 giorni possa risultare inferiore a quello di 1 giorno e così via.

TABELLA V. — Riporta il valore, la durata e la data delle precipitazioni di maggiore intensità e di breve durata registrate dai pluviografi.

TABELLA VI. — Riporta, per alcune determinate stazioni, per i mesi da gennaio a maggio e da ottobre a dicembre nei quali possono verificarsi precipitazioni nevose:

a) le altezze, in centimetri, degli strati nevosi sul suolo presenti nell'ultimo giorno delle tre decadi mensili;

b) il numero dei giorni nei quali si sono avute precipitazioni nevose;

c) il numero complessivo dei giorni di permanenza della neve sul suolo.

# Sezione A - TERMOMETRIA

## Abbreviazioni e segni convenzionali

| | |
|---|---|
| Termometro a massima e minima | Tm |
| Termometro registratore | Tr |
| Dato incerto | ? |
| Dato mancante | » |
| Dato interpolato | [ ] |

**Sono stampati in grassetto ed in *corsivo* rispettivamente i massimi ed i minimi.**

## CONTENUTO DELLE TABELLE

I dati sono trasmessi da Osservatori o da stazioni termopluviometriche controllati o dipendenti direttamente dalla Sezione.

Ogni stazione è fornita di un termometro a massima e di un termometro a minima, oppure di un termometro a massima e a minima uniti, che vengono osservati ogni giorno alle ore 9 antimeridiane.

Le letture eseguite ai termometri a massima e a minima vengono assegnate al giorno stesso dell'osservazione.

Le stazioni sono ordinate nelle tabelle secondo la rispettiva posizione idrografica.

Le tabelle sono precedute dall'elenco e caratteristiche delle stazioni termometriche che hanno funzionato nell'anno.

Tabella I. — Sono riportati, per alcune stazioni opportunamente scelte e che hanno regolarmente funzionato nell'anno, i valori massimi e minimi rilevati giornalmente, e le rispettive medie mensili, unitamente alla temperatura media del mese e dell'anno cui si riferiscono le osservazioni e le corrispondenti medie del periodo.

TABELLA II. — Per le stazioni della tabella I sono riportate:

a) le medie mensili ed annue delle massime e delle minime temperature osservate giornalmente e le medie mensili ed annue delle temperature diurne. Come « temperatura diurna » è assunto il valore della semisomma delle temperature massima e minima osservate in uno stesso giorno.

b) le temperature estreme (massima e minima) osservate in ogni mese e nell'anno, ed il giorno nel quale sono state osservate.

Tutte le temperature riportate sono espresse in gradi centigradi e corrispondono alle letture effettivamente eseguite, non essendosi effettuata la riduzione al livello del mare.

## CONSISTENZA DELLA RETE TERMOMETRICA AL 31 DICEMBRE 1963
